I am not going to worry about this right now. I really don't have time to stop right now to try to fix the computer. Maybe later. Thanks for the offer.

Not good. The decision was made last weekend to replace the Region 8 viewer with the Region 6 viewer. I do not know that our viewer would work any better. Call me if you want and I may be able to troubleshoot over the phone. I suspect you are running into too many people sucking up the limited bandwidth you guys have access to.

I hate to tell you john, but the viewer does not work on our older laptops.

All,

A new version a SADIE specifically for the Gold King ER is now deployed. This version is integrated with the popups in the Gold King Ops viewer. Region 6 is still working on migrating a Region 8 widget that further integrates SADIE with the Ops viewer.

**SADIE – Gold King Mine** (the main project to use is Gold King Mine Blowout)
